Skills Commons Accessibility Checkpoints

All information obtained from textbook evaluation will be entered into the checkpoints document:

3. **Text Adjustment**   PASS/FAIL: _____   Ranking:_____
   A. Text is compatible with assistive technology.
   B. The resource allows the user to adjust the font size and font/background color (or is rendered by an application such as a browser, media player, or reader) that offers this functionality).

   Additional Information: Please describe the technologies (hardware and software versions) and methodologies you used to evaluate the accessibility of the resource for this feature.

Enter info such as the pages you evaluated here as well.
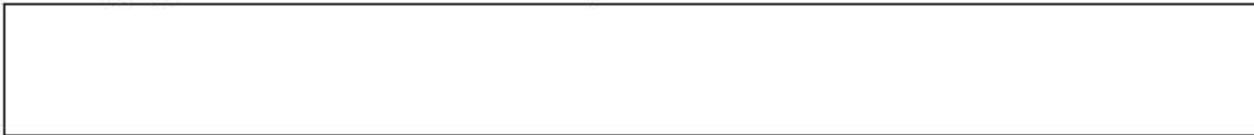

Pass, Fail, or N/A?

- Evaluate material based on the amount of material included in the checklist.
- If there is no related materials, mark N/A for that checkpoint. The only exception are <u>Acc Documentation</u> and <u>Flickering</u>.

No Flickering = Pass

No Acc Doc = Fail
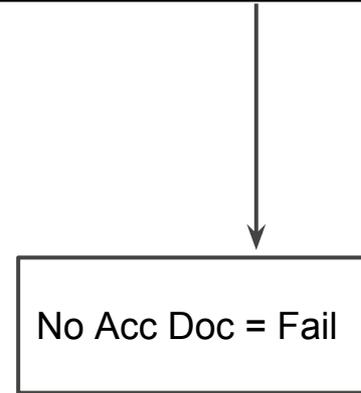

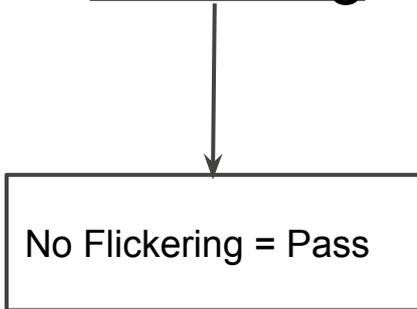

Ratings

- Ratings are on a scale of 1-10

Fail   7   Pass

1   5   10
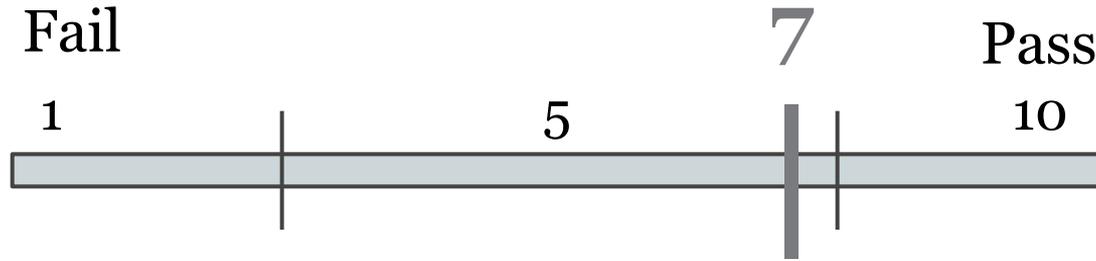

- Failure to meet a checkpoint (Fail) should not be rated above a 7
- Meeting a checkpoint (Pass) should not be rated below a 7

Ctrl + Alt + ↑	Cell Above

8. Hyperlinks

☑ Functionality: Links (e.g. website or email addresses) within the text of the digital resource are rendered as active hyperlinks in a manner that allows them to be detected and activated with assistive technology.

☑ Descriptive: The link is descriptive enough for the users to know where the link will take them. If the link appears as an URL = fail this sub-category.

  ○ E.g. CSULB homepage   O
    www.csulb.edu   X

☑ Checking for both in-book and live hyperlinks

Hyperlinks

1. Open the book with Microsoft Word > activate NVDA & enter Browse Mode
2. Locate a few hyperlinks
3. Use Links quick keys (TAB or Shift TAB) to check if the program can recognize it as a link, then press enter to see if the link function correctly (take you to the right location)
4. Tab through a total of 50 links (30 in-book, 20 live) from different section of the book to check for both <u>functionality</u> and <u>descriptive</u> name.

*** If nothing happens then the link doesn't work

9. Color & Contrast (Color Redundancy)

☑ Color redundancy (information is not conveyed by color alone) needs to be checked manually

n changes in classrooms has several other effects. One, for example, is that it can tempt teachers to think that what is taught is equivalent to what is learned—even e different. If I assign a reading to my students about the Russian Revolution, it would be nice to assume not only that they have read the same words, but also lear read and learned all of what I assigned; others may have read everything but misunderstood the material or remembered only some of it; and still others, unfortunat firm this picture, if asked confidentially. There are ways, of course, to deal helpfully with such diversity of outcomes; for suggestions, see especially **Section 10.1** ctional strategies I adopt, they cannot include assuming that what I teach is the same as what students understand or retain of what I teach.

as dependent on sequencing and readiness

veen teaching and learning creates a secondary issue for teachers, that of educational **readiness**. Traditionally the concept referred to students' preparedness to c o start school, for example, if he or she was in good health, showed moderately good social skills, could take care of personal physical needs (like eating lunch or **Table 2.6** shows a similar set of criteria for determining whether a child is "ready" to learn to read (Copple & Bredekamp, 2006). At older ages (such as in high To take a course in physics, for example, a student must first have certain prerequisite experiences, such as studying advanced algebra or calculus. To begin work to mention also studying educational psychology!).

E.g.
Links are presented with color (blue) and underline.

9. Color & Contrast (Contrast Ratio)

☑ The visual presentation of text and images of text in the digital resource has a contrast ratio of at least 4.5:1 (AA)

☑ Large text (18 point +) has a contrast ratio of at least 3:1 (AA)

Normal text

Large text

Color & Contrast (Contrast Ratio)

Colour Contrast Analyzer (CCA)

1. [Download Colour Contrast Analyzer Tool](#)

2. Open the book you want to evaluate with Adobe Acrobat

3. Open the CCA application
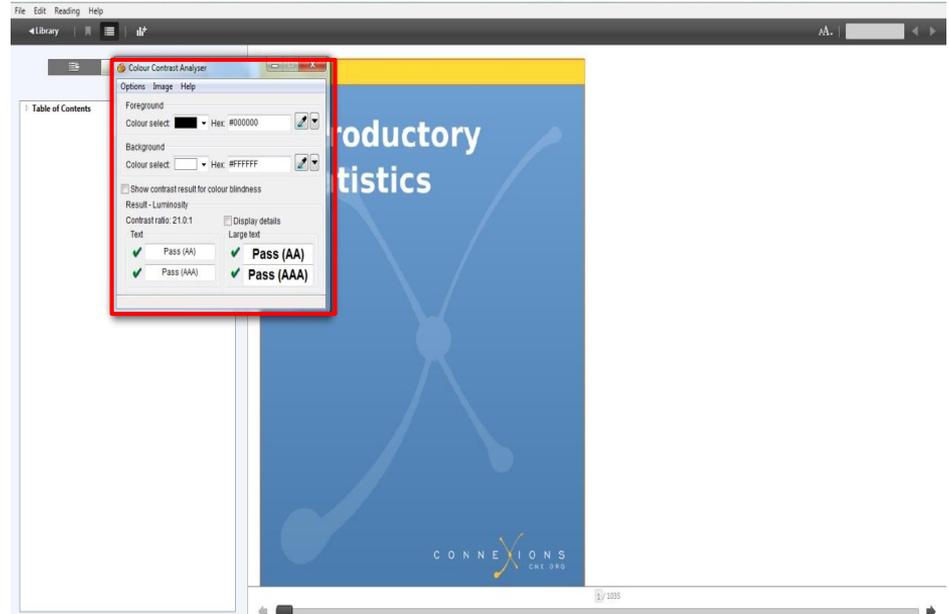

Color & Contrast (Contrast Ratio)

4. Make sure you are in the **Result -- Luminosity** mode.

5. Click the **Foreground eye dropper** tool, hover over and click the foreground color to select it.
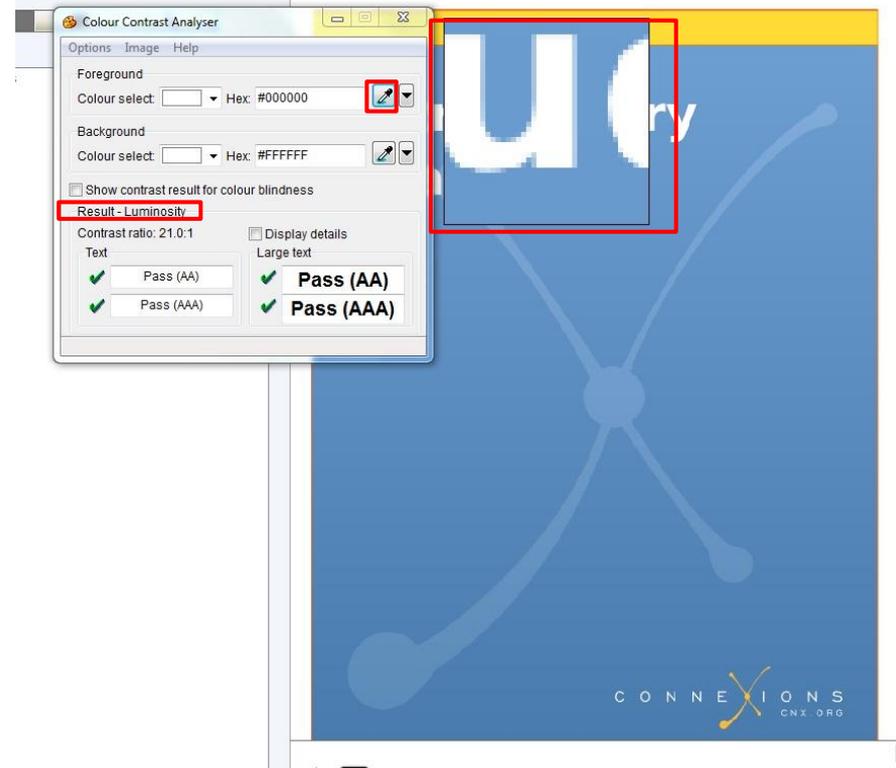

Color & Contrast (Contrast Ratio)

6. Click the **Background eye dropper** tool, hover over and click the background color.

7. Determine if the text is greater than 18 points (e.g. Header).

    Small text: Check under "Text" (AA)

    Large text (18+): Check under "Large text" (AA)
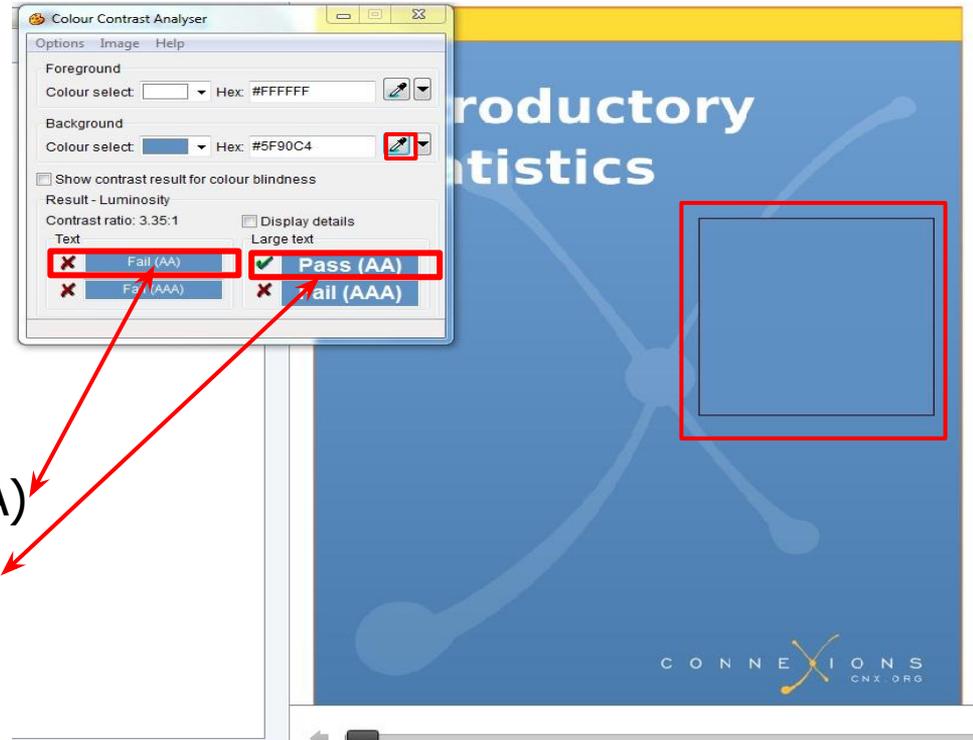

10. Language

☑   The text of the digital resource includes markup that declares the language of the content in a manner that is compatible with assistive technology

☑   If the digital resource includes passages in a foreign language, these passages include markup that declares the language in a manner that is compatible with assistive technology

10. Language

STEPS:

1. Locate the book > right click > Properties
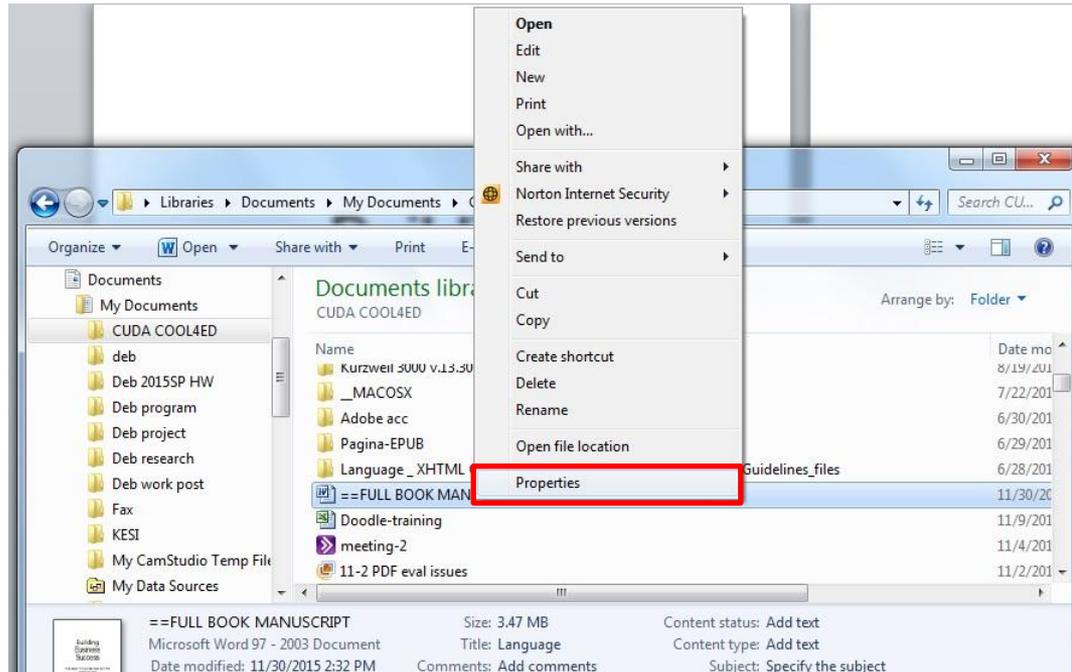

10. Language

2. Select "Detail" and scroll down until you see "Language"
3. Check if the language of the book is indicated next to "Language", if not, mark as failed instead of N/A.
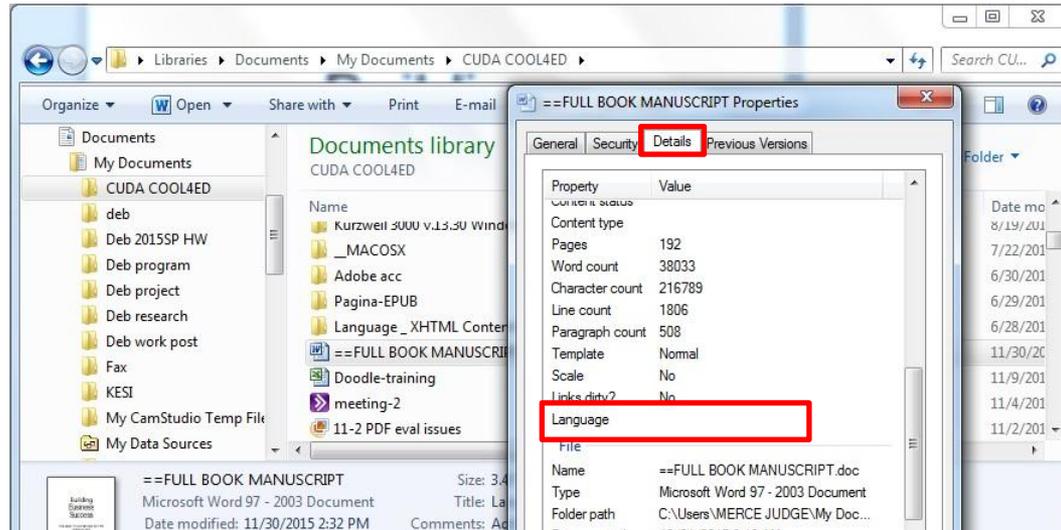

11. Images

☑ Non-decorative images have alternative text that is compatible with assistive technology (or is rendered by an application such as a browser, media player, or reader that offers this functionality)

☑ Decorative images are marked with null alternate text or contain markup that allows them to be ignored by assistive technology

☑ Complex images, charts, and graphs have longer text descriptions that are compatible with assistive technology

Images

STEPS:
1. Open the book with Microsoft Word > activate NVDA & enter Browse Mode
2. Locate an image
3. Use Image quick key (G) or Link quick key (TAB) to check if the program recognize it as an image or link.
4. Check if the image have alternative text

Practice and examples

Images (Additional Manual Check)

- Check manually: Make sure the descriptions for the images are descriptive enough for both non-decorative images and complex images.

- <u>Rule of thumb</u>: if the image cannot be described in one sentence, it's complex!

12. Multimedia

- ☑ A synchronized text track (e.g., open or closed captions) is provided with all video content
- ☑ A transcript is provided with all audio content

STEPS:

1. Search the entire book for multimedia content
2. Search for synchronized text tracks or transcripts

***If there's no multimedia, mark N/A in the reports

12. Multimedia

☑ Audio/video content is delivered via a media player that is compatible with assistive technology

Not using additional assistive tech to open audio/video content, mark N/A in all reports for this sub-category.

12. Multimedia (Synchronized Text)

1. Find multimedia
2. Search for availability of a text track (e.g., CC)

12. Multimedia (Transcript)

1. Find multimedia
2. Search for availability of a transcript

12. Multimedia (Transcript)
